

## **NBS Focus Point: Blockchain Technology**

**Speaker:**

**Dr Zhao Wei**

Research Scientist, Blockchain Lead

IBM Research

Dr Zhao Wei is Research and Project Lead of IBM Incubation for decentralised interbank payment and settlement solution on Hyperledger Fabric. Her most recent efforts are on driving enterprise blockchain go-to-market as well as advancing blockchain technology boundaries, exploring and designing innovative blockchain technologies and solutions for finance and trade logistics industries.

Prior to her present stint, Dr Zhao Wei was Project Lead of Intermodal Trade Logistic Blockchain PoC with PSA under the Singapore-China G2G collaboration's Chongqing Connectivity Initiative Programme for a smoother, more transparent and fairer platform of intermodal logistics for international trades. She was also Project Lead of Taiwan Cathay Life Insurance, China UnionPay Research Institute of Electronic Payment, SANY Group, Bank of China and People's Bank of China on various blockchain solutions for financial services.

Dr Zhao Wei graduated from Northwestern Polytechnic University with a Bachelor and a Master Degree in Computer Science. She also holds a PhD Degree in Software Theory from Peking University. Her research areas include Software Development Governance, Machine Learning, and Blockchain.
